

EXPERIENCE

SOFTWARE ENGINEER

BUSTLE. AUGUST 2016 – JANUARY 2017

Continuously deployed via AWS and the command line per the Bustle Labs protocol.
Migrated and refactored front end features from Ember to vanilla Javascript.
Front end feature contributions included engineering tandem content types across multiple repositories in a variety of Javascript frameworks, CSS animations, Google Maps API implementation, and supporting individual contributions with unit tests.

SOFTWARE ENGINEER

LAUREL & WOLF. OCTOBER 2015 – APRIL 2016

Built an engineering operations system which directly impacted the fulfillment of client data change requests and reduced errors in production data changes.
Planned and proposed a style guide project to refactor design discrepancies and update CSS management. Planned outcomes included consistent UX, faster turnaround on front end feature work within sprints, and improved performance after removal of technical debt.
Front end feature contributions ranging from implementing A/B and Multiarm bandit tests, managing state via Redux, and constructing reusable React JS components.

ORGANIZER

NODE TOGETHER. JUNE 2016 – CURRENT

Remotely coordinating resources for on site events; paying special attention to location physical accessibility, credibility within the local Javascript developer community, and adherence to inclusive practices.
Soliciting sponsors and directly communicating with their teams to strategize effective partnership including cross promotion, timelines for execution, and outreach.
Cooperatively administrating the community Slack and participating as a source of information for event details within local channels.

OPEN TECH LAB VOLUNTEER

PROCESSING FOUNDATION. FEBRUARY 2016 - MARCH 2016

Worked with Processing Foundation and Women's Center for Creative Work (WCCW) to provide space and assistance to underrepresented minorities entering the tech industry.

MENTOR

DTLA PAIR PROGRAMMING. JULY 2015 - JULY 2016

Mentored and pair programmed on Test Driven Development (TDD) focused Javascript exercises, led stand up, and helped beginners overcome roadblocks.

GET GIT GOT WORKSHOP INSTRUCTOR

MAPTIME LA. JUNE 2015

Constructed a curriculum and taught geographers and first time programmers to learn about the command line, version control, git, and GitHub.
